# HYBRID THREATS AND RESILIENCE IN EUROPE: COUNTERING HYBRID THREATS IN TIMES OF CRISIS

University of Sarajevo - Faculty of Political Sciences

05 December 2022

10:00 - 13:30

## REASON FOR THIS TOPIC

There is a lack of research that would point out to a comprehensive approach to addressing, identifying, and countering hybrid threats in times of crisis, such as the war in Ukraine. Being a security fragile region, the Western Balkans have come under international limelight due to security concerns and increased cyber and other attacks on the Western Balkan countries. The workshop on the hybrid threat and resilience of the countries to counter them will feed into the discussion on the Western Balkans under the European security framework and will serve as a starting point for increasing awareness of this topic.
